

Gastronomic kiosk

Endless possibilities

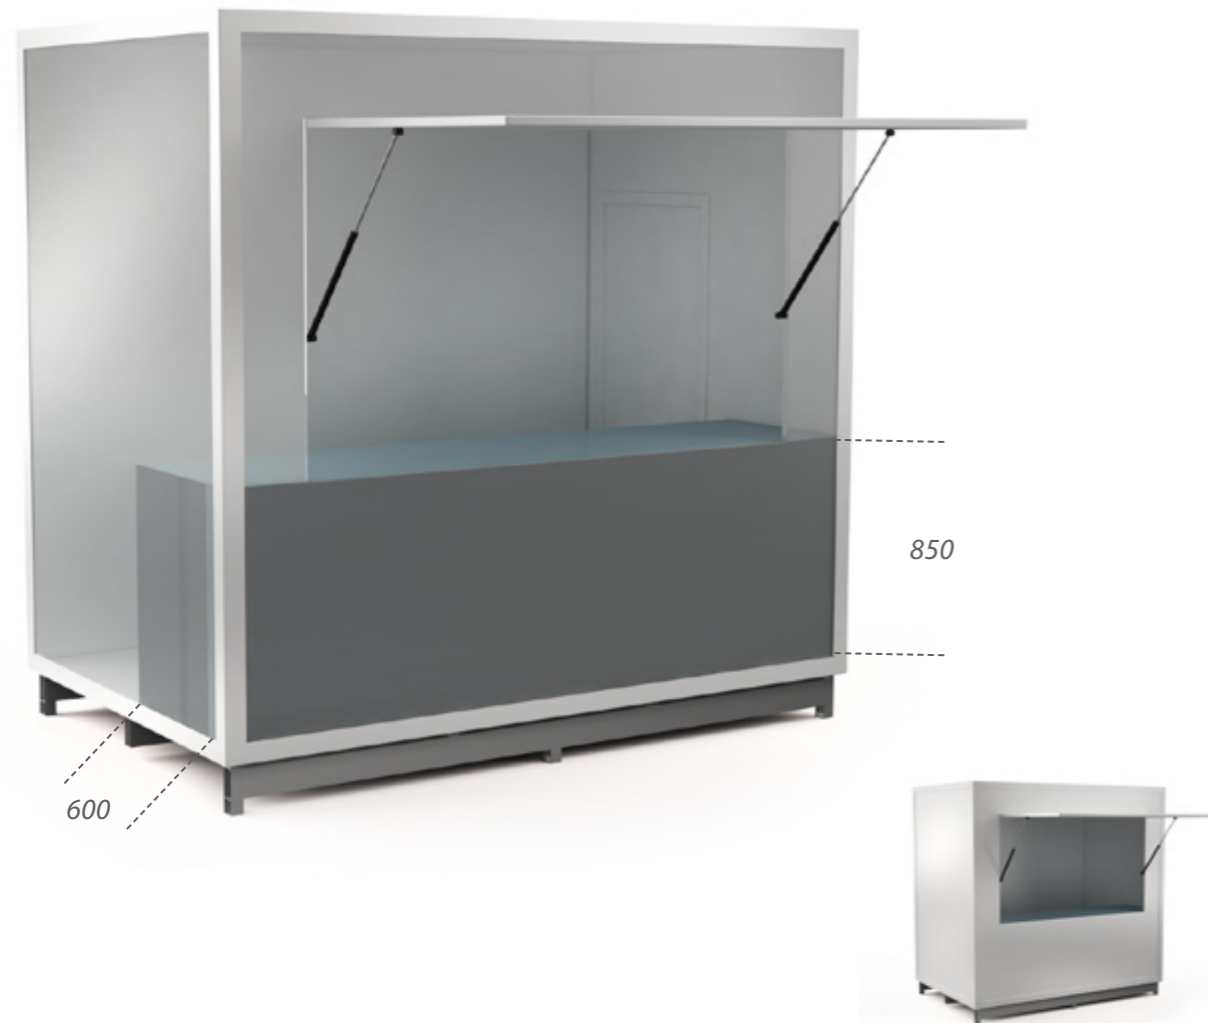

WHY CHOOSE US?

Gastronomic kiosks are perfect solutions thanks to which you may have your own gastronomy business by investing relatively small amount of money. Very often investors have appropriate land, an access to a promenade, or any other place where a gastronomy business will suit perfectly, however, the costs of a building are too high for them, or they do not want to build anything permanently associated with a ground.

Thanks to the kiosks, you have the opportunity to put up a small "building" without any legal restrictions, and with the possibility of transporting to another place if needed.

We produce the kiosks in two versions: with an internal depth of 1600 mm and with an internal depth of 2200 mm. Depending on the place you have, we may arrange one, or two furniture lines inside.

Information

A gastronomic kiosk which may be located on land, in a shopping centre, or near a promenade

Case made of sandwich panel

1 x rising window

1 x door

An insulated floor

Electrical installation

Lighting

For transportation, a forklift is needed
