

Variants

Wooden | Stainless steel | RAL painted

Description

The gastronomic bike with the chest at the back is a twin product with a typical gastronomic bike. It is an alternative for people who for some reason prefer to pull the chest rather than push it by bike.

Equipped with a folding roof, sink and a large storage as standard. It can be made in three versions: wooden, steel or powder coated.

The bike can be equipped with all the options, available by bike with a standard box - coffee, ice cream, juice, grill or any other option.

 Bike (mm): 2670x1100x2200 h  
 Height (with a folded roof) (mm): 1700 mm

Features

Features

 <p><b>Strong 21" wheels</b> We designed strong wheels with a diameter of 50 cm which make moving around the city facile and comfortable.</p>	 <p><b>Folding top</b> In the back of a bike, we can put an additional folding top (55 cm) which will increase your working space over 40%. Easy opening and folding is guaranteed by the system of guidelines and latches.</p>	 <p><b>Folding roof</b> A construction of a roof is made of circle profiles, and it can be folded easily. We designed strong screws to prevent from falling of a roof in an unexpected moment.</p>	 <p><b>Possibility of removing of a roof</b> In order to facilitate transport and storage of a bike, we designed a removing roof. Simply you need to turn some screws, and a roof is removed. Moreover, if you get bored of a colour of a roof, you can easily replace it.</p>
 <p><b>Firm bike frame painted at any colour</b> The double tube frame ensures stable driving as well as solidity of the whole construction. It's screwed to the front part of a bike so it can be disassembled easily during servicing or shipping. While placing an order, it is possible to choose a colour of the bike frame (RAL colour chart).</p>	 <p><b>Hydraulic brakes with an option of parking brake</b> The strongest brakes available on the market guarantee safe driving. A parking brake facilitates placing a bike while working.</p>	 <p><b>Electrical installation</b> In our bike, we use reliable mobile power technology which consists of gel batteries, a charger, and a converter. Charging is extremely easy - all you need to do is to connect the installation to a plug using typical 230 V cable; it lasts about 6 hours. The installation includes a display on which you can check the battery level.</p>	 <p><b>Large storage cabinet</b> As the early company, in such a small space we managed such a large storage space. A cabinet with a dimension of 760x500x70 which can be opened in the front part of a bike, will hold all your products and accessories. A bottom part of storage cabinet is perforated - it is extremely important in case of bikes with gas supply.</p>
 <p><b>Turning radius: 3 m</b> Thanks to the specific construction of the bike, it's possible to maneuver in a very small space.</p>	 <p><b>Waterproof fabric roof</b> A roof is made of waterproof Cordura fabric; it is strong and resistant to mechanical damage. In order to wash the fabric, you can easily take it off from a frame. You can choose the colour of the material, and moreover we can put your company logo on it.</p>	 <p><b>Stainless steel top</b> To increase the quality, and to improve cleanliness of work, we designed a stainless steel top which is easy to clean and resistant to mechanical damage.</p>	 <p><b>Master key</b> You can open all the cabinets using one master key. If the key is lost, we will provide you with a new set of keys.</p>
 <p><b>Box</b> Make your bike unique! You can choose from three different versions: waterproof plywood, stainless steel and RAL painted.</p>	 <p><b>Folding side covers</b> In order to make storage of a bike as easy as possible, we designed folding side covers. Simply you need to raise one element and the covers are folded.</p>	 <p><b>Built-in sink</b> A bike includes a built-in sink in which you may wash your hands, or some accessories. It is connected with water containers which you can refill and clean easily. A dirty water container can be cleaned out by a valve located under a bike.</p>	 <p><b>Easy to refill water container</b> A clean water container with a capacity of 20 l is equipped with a water infusion. Inside a container we used special diaphragm which guarantees that water won't spill out during moving. Moreover, you can easily remove water containers in order to clean them.</p>
